

JENNY HAGENBLAD AND  
ULRIKA CARLSSON-NILSSON

## From ancient barley to arctic peas -Crop adaptation in the Nordic region

**9:30-10:30 Jenny Hagenblad** “6000 years of growing barley in Sweden”

Jenny Hagenblad, associate professor at Linköping University, studies the genetic variation in cultivated plants to understand their evolutionary history and how crops like barley adapted to new climates over millennia.

**10:30-11:00 Ulrika Carlsson-Nilsson** “Genetic resources targeting pea cultivation in the Arctic”

Ulrika Carlson-Nilsson, senior scientist at NordGen, focuses on the conservation and sustainable use of Nordic genetic resources, particularly grain legumes and other plants.

**9/10 9:30-11:00**

**Horticum Alnarp SLU**

*Room Triticum*

*Enter from Växtskyddsvägen 1*

Mendelian Society  
*in Lund*

The seminar is presented by the Mendelian Society in Lund
